Project Description:
The Hospital Management System is a modern Java-based application redesigned with Spring Boot, Hibernate, and React.js. It efficiently manages hospital records, including doctors, patients, and prescriptions. The backend utilizes Spring Boot and Hibernate for ORM-based CRUD operations, providing a robust and scalable data management solution. The frontend is developed using React.js for a dynamic and responsive user interface, incorporating features like search and report generation. Adhering to the MVC pattern, the system ensures a well-organized and maintainable codebase.
